

Your local fire department cares! Always call 911 if you need us.

Smoke detector program continues

We have had great response to the smoke detector installation program! We will be continuing to provide and install smoke alarms as long as there are those who need them. Call us at 541/563-4441 and we will send out installation experts to assess your needs and go over your current "safety plan."

SRFD Roster

- 4 paid FTE (including office staff)
- 9 Reserve staff
- 26 Volunteers (911 & support)
 1. EMS: 3 paramedics; 10 EMTs; 9 EMR
 2. Fire: 17 volunteers at FF1 level
- Calls since 1/1/23: 386
- June calls: 52 July: 64

A reminder that as we head into Fall and winter we need to be thinking ahead!

BURN INFORMATION!

As our weather continues to change daily, affecting the burn ban, please call us or ODF or check our website for updated information on backyard burning.

You can visually attend our monthly Board Meeting now on YouTube! Just type in Seal Rock Fire. Meetings are the 3rd Thursday of each month at 5pm.

THANK YOU Seal Rock!!

Our thanks goes out to everyone who voted to pass the levy again this fiscal year. We have a new budget that has gone into effect as of July 1st and have plans for some much needed renovations to our Seal Rock buildings.

Are You Prepared??

Every so often households should review their emergency plans for any event that could prevent us from going about our usual lives. I'm referring to winter storms that knock out power or even the BIG ONE that will cut us off from others and strand us from stores and maybe neighbors as well. Do you have water, food and supplies to get you through a month? It could take that long before reinforcements arrive to assist the coastal communities. If you need help putting your emergency plans together please come see us and we're happy to assist with that. It will take cooperation and willing hands to weather all kinds of storms! SRFD is here to help the community!

Thoughts from the Chief

I hope this finds everyone in good health & good spirits! While we have been in the middle of a summer heat wave SRFD is already making preparations for the fall and winter. It's hard for us to know what each season will bring. July was especially busy with several structure fires, a series of brush fires and several vehicle crashes. The danger of wildfires is still with us, so stay informed of the restrictions involving fire danger mitigation. We've had numerous calls about the fire hydrants, the fire works, smoke detectors and even how to install car seats. All of these are important but we aren't always able to address public concerns immediately. However we are doing a great job responding to all of our 911 incidents. As we move forward we hope to be in a position to proactively address some of the other concerns that come up. In the meantime, you all can go to bed at night knowing that Seal Rock Fire is here and ready to help. Be safe out there!!
